Email: shivdwivedi289@gmail.com

Mobile: +91 7354482856

SKILLS

Programming Languages:	Python, C++
Data Science and ML:	Pandas, NumPy, Data Cleaning & Preprocessing, Matplotlib, Seaborn, Scikit-learn
Tools & Deployment:	Git, GitHub, Jupyter Notebook, VS Code
BI & Analytics:	Power BI, DAX, Power Query, Data Modeling, SQL, Excel
Soft Skills:	Problem-Solving, Time Management, Adaptability

PROJECTS

Customer Churn Prediction | Github

Oct' 25 – Dec' 25

- Built and optimized robust machine learning models using Logistic Regression and Decision Trees to predict customer churn risk, directly supporting data-driven business retention strategies.
- Established an end-to-end data pipeline for processing raw customer data using Pandas and NumPy, performing data cleaning, missing value treatment, text-to-numerical encoding, and feature scaling.
- Analyzed feature importance to identify key churn drivers such as usage behavior, contract type, and customer support interactions to help businesses proactively improve user retention.

Tech stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

Amazon-Style E-Commerce Sales Dashboard | Github

Oct' 25 – Nov' 25

- Designed a multi-page Power BI dashboard to analyze Amazon-style e-commerce sales, customer behavior, and business performance using interactive visualizations and KPIs across multiple business functions.
- Implemented an optimized data model with Power Query, DAX, calculated measures, and relationships to deliver dynamic reports with slicers, drill-through, cross-filtering, and advanced analytics.
- Delivered customer, product, and order analytics dashboards to monitor revenue, sales trends, returns, shipping costs, and category-wise performance for actionable business insights.

Tech stack: Power BI, DAX, Data Modeling, Business Analysis, Dashboard Development

TRAINING

Library Book Management System- Lovely Professional University

Jun' 25 – Jul' 25

- Created a menu-driven Library Book Management System to efficiently manage book records, user information, and book issue/return operations with a structured and user-friendly interface.
- Utilized Linked List-based storage with efficient CRUD operations to perform dynamic book insertion, deletion, updating, searching, record management, and efficient data organization.
- Integrated a Queue-based issue/return module to ensure FIFO processing, transaction validation, efficient book circulation, reliable record management, and smooth workflow execution.

Tech stack: Data Structures & Algorithms (Linked List, Queue), Problem Solving, Logical Design

CERTIFICATES

- | | |
|---|---------|
| • Cloud Computing – NPTEL Link | Nov' 25 |
| • Fundamentals of Data Structures: Learn, Apply and Build Projects Link | Jul' 25 |
| • Object-Oriented Programming – LPU Link | Dec' 24 |
| • Data Structures and Algorithm – LPU Link | Dec' 24 |
| • Introduction to Hardware and Operating System – Coursera Link | Sep' 24 |

ACHIEVEMENT

Solved 150+ coding problems across LeetCode and GeeksforGeeks, sharpening problem-solving skills.

May' 26

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.13**

Punjab, India
Aug' 23 - Present

School of Excellence Sidhi

Intermediate; **Percentage: 81.80**

Sidhi, Madhya Pradesh
Jun' 21 – Apr' 22

Govt. Higher Sec. School

Matriculation; **Percentage: 93.25**

Sidhi, Madhya Pradesh
Jun' 19 - Apr' 20
